Subject: Re: Cisco ONE slides

Agreed, and thanks. You and I should work together to make sure the message and the substance are in sync. Andre is a great person to have in the loop on this too.

I want to build EAPIs so badly... this part is coming one way or another... having a few sample EAPI applications would be a good piece to have along with that... potentially, the sample can itself be marketed... e.g., central ACL manager.
